

Journal Abbreviations

Jonathan Webley
jonathan.webley@gmail.com

6 September 2021

Introduction

Many academic publishers require that in a bibliography, journal names are abbreviated. Their aim is to reduce the space needed for references, especially for printed publications. Of course, it is important to ensure that journals are abbreviated consistently and, more or less, uniquely. However, journals come and go, so keeping track of them is a relentless task. It is easier to provide a list of the common words found in journal titles. Thus, this is a brief guide to some common abbreviations, mainly for science, medical, technology and engineering journals published in English. The list of abbreviations also includes common words that are not abbreviated, and these are marked with a dash.

The purpose of the lists here are, thus, twofold: (1) to assist authors and editors in creating reference lists and (2) to assist readers in understanding reference lists.

Please email me with corrections and suggestions, preferably with a link to relevant sites: jonathan.webley@gmail.com

General rules

- Journal names consisting of a single word are not abbreviated, even if an abbreviation is available. Here are some common ones:
 - Bioinformatics
 - Biomicrofluidics
 - Chaos
 - Nature
 - Science
- A point can be added to each abbreviation if required by the journal (see ‘List of abbreviated journal names’ for examples).
- Otherwise, in general, punctuation is also deleted.
- Plurals have the same abbreviation as the singular (e.g., ‘engineer’ and ‘engineers’ → ‘eng’).
- Sometimes, an abbreviation is itself a word, in which case the word is not included here on the right (e.g., ‘assisted’ → ‘assist’).
- In general, words of four or fewer characters are not abbreviated and so are not listed here. The exception is ‘new’ (see ‘Journals with ‘new’ ’).
- The abbreviation must be at least two letters shorter than the word. For example, ‘psychiatry’ is not abbreviated but ‘psychiatric’ → ‘psychiatr’.

Short words

Prepositions, pronouns, conjunctions, articles – and similar – are always deleted:

&	for	its	the
a, an	from	of	with
and	in	on	

Though note that some journals are ‘Part A’ and that ‘A’ is retained.

Organisation abbreviations

Some organisations that publish journals include the abbreviation of the organisation name in the journal titles, such as *BMC Genetics*. These abbreviations are not further abbreviated.

Deprecated uses

Some uses of an abbreviation are marked as *deprecated*. These should no longer be used as a better alternative is available. A use is deprecated if there is a more common alternative, a more apt alternative or if the abbreviation is more commonly used for another meaning. For example, ‘Eng’ is deprecated for ‘Energy’ since ‘Eng’ is more commonly used for ‘Engineering’ and similar words. Deprecated uses are listed because they may exist in the references or bibliography of some publications.

Common prefixes

If an entry is not found for a word with one of these prefixes (or similar prefixes), then check to see if there is an abbreviation for the word without a prefix. For example, if there were no entry for ‘nanotechnology’, since ‘technology’ → ‘technol’, then ‘nanotechnology’ → ‘nanotechnol’:

anti-	cardio-	hydro-	nano-	radio-	ultra-
astro-	electro-	micro-	neo-	semi-	
auto-	geo-	multi-	neuro-	thermo-	
bio-	histo-	myco-	psycho-	trans-	

Common suffixes

If an entry is not found for a word with one of these suffixes, then base the abbreviation on the standard abbreviation for the suffix:

-graphy	-gr
-metry	-metr
-ology	-ol
-oscopy, -oscope	-osc

Journals with parts

Some journals have ‘parts’, e.g., *Journal of Nuclear Energy, Part A: Reactor Science*. Such journal names are commonly abbreviated in two ways, either truncating after the colon or not truncating:

- J Nucl Energy Part A
- J Nucl Energy Part A: Reactor Sci

There does not seem to be any logic as to why one journal is abbreviated one way and another the other way, so both versions are given in the journal list.

Journals with ‘new’

Being a three-letter word, ‘new’ is not normally abbreviated. However, with place names such as ‘New England’, ‘New York’ and ‘New Zealand’, it is commonly abbreviated to ‘N’. In that case, the ‘York’ in ‘New York’ is also abbreviated, again inconsistently, and with or without a space: ‘NY’ (‘N.Y.’) or ‘N Y’ (‘N. Y.’). The recommendation here is without a space.

Similarly, ‘United States of America’ should be abbreviated as ‘USA’ (‘U.S.A.’), as would normally be seen in print, rather than with spaces between the letters: ‘U. S. A.’

Standard journal abbreviations

Some journals have recognised abbreviations, which are commonly used in place of an abbreviation based on abbreviating the individual words. In some cases, the abbreviation has become the official name of the journal. These journals are in the main list of journals, but here are some examples:

BMJ	British Medical Journal
CALPHAD	Computer Coupling of Phase Diagrams and Thermochemistry
MNRAS	Monthly Notices of the Royal Astronomical Society
PNAS	Proceedings of the National Academy of Sciences of the United States of America
